Migratory Species: linking Ecosystems and Disciplines

Workshop on behalf of the 25th anniversary of the Bonn Convention

Venue:

World of TUI
Unter den Linden 17
10117 Berlin
Germany

Date:

22.6.04 – 23.6.2004

The 25th anniversary of the Convention on the Conservation of Migratory Species of Wild Animals (also known as CMS or the Bonn Convention) is an excellent opportunity to analyse what has been achieved until now, and how the convention might operate in the future. The convention has gone a long way during the last years, and now cooperates with other organisations and initiatives from all over the world, to improve and secure the conservation status of migratory species. Together, scientists, practitioners and politicians will learn and discuss how their conservation goals and policies could be harmonised towards "best practise" schemes. Presentations and discussions are grouped within three thematic blocks, dealing with ecological, political and interdisciplinary issues, entitled

- Linking Ecosystems through Migratory Species
- Uniting Forces for Nature: Complementing the United Nations' Instruments
- Improving Knowledge for Conservation: the Contribution of New Technologies

Workshop results will be communicated to the public during round tables and a press conference, directly followed by the formal celebration act on 23rd of June, at 2 pm. Further details, as well as workshop results, will be published on the World Wide Web, at the GROMS website (see <http://www.groms.de>). Public lectures on 22nd (evening: by Prof. Dr. B. Meyburg, World Raptor Program, Berlin), and 23rd (morning: Migratory species in the Oceans) will increase the visibility of the event. For further details on the program, see the "news" section of the GROMS website (<http://www.groms.de/news>)

If you wish to contribute or participate, please fax this form, or email the required information directly to the organiser, Dr. Klaus Riede, ZFMK, k.riede.zfmk@uni-bonn.de
